

Neutral(Detached) Decay Search (Just Started!)

- Will do systematic “neutral” decay search on all events
- Using Bruce’s “v0decay” code
- Shanti has modified the analysis code to write out vertex parameter information to a ntuple such as ...
 - number of vertices/event
 - number of tracks/vertex
 - track angles
 - decay lengths, etc ...
- Will use a selected sample from above study to check by “eye”
- Hope to have results by Hawaii
